(54) Title: PERSONAL CARE APPARATUS WITH AN AUTOMATICALLY PIVOTABLE HEAD PART

(57) Abstract: In a personal care apparatus (1) having a main part (2) and a head part (3), the main part (2) is designed to be held in one hand, the head part (3) is pivotable relative to the main part (2) about an axis of pivot (26) and a return spring (55) is provided between the main part (2) and the head part (3), thus enabling the head part (3) to be pivotable by means of the return spring (55) in synchronization with varying displacing forces that act on the head part (3) in the course of a hair-cutting operation, and to be positionable by means of the return spring (55) in a defined rest position relative to the main part (2) when there are no displacing forces present.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the International filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the International filing date but later than the priority date claimed

- "T" later document published after the International filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family
